

Gap & Gap Cover

Medical treatments have a general fee set by the government known as the Medical Benefits Schedule fee.

For treatment received in hospital, Medicare and your health insurer will cover 100% of the schedule fee.

However, sometimes doctors charge more than the MBS fee. This creates a gap which you need to pay.

To help with this, health insurers offer Gap Cover. It covers some of the Gap cost. And means you'll pay less out of your own pocket.

Frank's Gap Cover covers you for 20% above the MBS fee and it's included in all Frank's hospital covers.
