

Hospital Cover

If you want to be treated as a private patient but don't want to incur the full cost, you'll need hospital cover.

Having hospital cover means your health insurer will help pay the costs associated with private treatment.

Frank has 3 levels of hospital cover.

- **Basic** cover covers you as a private patient in public hospitals. It covers all the treatments you can receive in a public hospital.
- **Better** covers you in participating private hospitals and includes most, but not all treatment types. In particular, childbirth services are excluded.
- **Best** is Frank's deluxe hospital cover. It covers you in participating private hospitals for the full range of treatment types.

Each of Frank's hospital covers has an excess, which is payable if you're sent to hospital.

The most you'll pay for excess in a calendar year is \$500 for singles and \$1000 for couples and families.
